INDIA LOKSABHA ELECTION RESULTS 2024

Problem Statement

The objective of this project is to analyze the **India Lok Sabha Election Results 2024** using SQL queries. The project focuses on extracting, aggregating, and comparing election data across states, constituencies, and political alliances.

This project demonstrates how SQL can be applied to **real-world political datasets** to generate actionable insights, enabling structured reporting and portfolio-ready dashboards for data analysis.

- Total Seats in Lok Sabha.

```sql
select COUNT(*) from constituencywise_results;
```

	(No column name)
1	543

- What is the total number of seats available for elections in each state

```
Select st.State,COUNT(constituency_ID) as Total_No_Seats from
constituencywise_results cr
join statewise_results as sr
on cr.Parliament_Constituency = sr.Parliament_Constituency
join states as st
on sr.State_ID = st.State_ID
group    by st.State
order  by st.State;
```
